TO TEST LAW

Civil Service Measure Will be Tried Out in Courts—Treasurer Mitchell Objects to Application of Law to His Office.

The constitutionality of the state wide civil service law is to be tested in the courts because of the refusal of the state auditor to certify to State Treasurer Mitchell, the salaries of Assistant Treasurer Andrew Russell, J. P. Bacon, chief clerk, and Harry Luehre, cashier of the state treasurer's office, until the payroll has been passed upon by the state civil service commission. Mr. Mitchell intends to take the matter into the courts.

Mr. Russell was asked about the matter last night and stated that the suit will be entered to clear up the matter in the courts. It seems that it was the understanding of all state officials prior to the passage of the

wide civil service bill, that the bill was not intended to cover the clerks or guards employed in any of the state offices. Janitors and some others were to be the only ones included and with this understanding all of the state officials lent their support to the bill.

It naturally seems to Treasurer Mitchell and other officials that there would be neither reason or justice in having the confidential men in their respective offices appointed under civil service. Men in these offices hold positions of trust which materially affect the officers themselves and the situation might easily become embarrassing if the officers had nothing to do with the naming of their assistants. State Treasurer Mitchell has consulted Judge Axel Chytrus of Chicago, with a view of having mandamus proceedings instituted to compel the auditor to certify to the payroll. Judge Chytrus is absent on a vacation, and consequently, the brief has not been prepared.

HAS NEW ENTERPRISE.

William Cocking has recently opened a concrete block and tile plant on a five-acre tract he purchased on Webster avenue adjoining the Wabash railroad. He has a force of eight or nine men at work and with the latest machinery is now turning out concrete blocks and tile every day. The tile machine is something new for this locality and is well worth inspection simply as a matter of interest. It turns out completed tile with marvelous rapidity and works almost automatically. Mr. Cocking's advertisement appears in another column of this paper.

THE EMPORIUM.

THE DEER.
It was rumored around the square yesterday that the much mooted question about deer being in central park was only an imagination of persons known about the city as forunks. A former resident of this city now residing in a Pacific coast city, who has been heard from, states positively that he well remembers when the iron fence enclosed central park and that there were inside the enclosure two fine deer, which had a well beaten path completely around the inside of the fence and a barbed wire was placed about two feet above the iron pickets. "Fess up you old citizens that never forget anything, an open confession is good for the soul."

THE BIRTH RECORD.

Born, to Mr. and Mrs. O. B. Cannon of Kentucky street, a son, O. B., Jr.
Born, Saturday morning to Mr. and Mrs. J. C. Hart of 923 Beesley avenue, a son.
Sheriff Rogers recently received a letter announcing the arrival of a daughter at the home of Rev. and Mrs. T. J. Simons at their home at Vero, Fla. Both Mr. and Mrs. Simons are well known here, the latter being a sister of Mr. Rogers.

HAY FEVER, ASTHMA and SUMMER COLDS

Must be relieved quickly and Foley's Honey and Tar Compound will do it. E. M. Stewart, 1334 Wolfram St., Chicago, writes: "I have been greatly troubled during the hot summer months with Hay Fever and find that by using Foley's Honey and Tar Compound I get great relief." Many others who suffer similarly will be glad to benefit by Mr. Stewart's experience. J. A. Obermeyer, Druggist.

A BEAUTIFUL PLANT.
Thomas Duffner has displayed last night in front of the store of the Jacksonville Tailoring company on East State street a night blooming cereus plant with eight beautiful blossoms on it. The plant is twenty years old and is the property of Miss Duffner who has a great many flowers and plants.

It's a losing game but FRANK BYRNS needs the room, that's why he is closing the old hats, worth \$3.50 and \$5.00 for \$1.57 Monday.

GOOD SWIMMING RECORD.
LaFont Andrews, who is spending the summer with his parents, Mr. and Mrs. F. J. Andrews at Waupaca, Wis., has won the championship for long distance swimming at that place this year. Accompanied by three boats and a number of men he swam a distance of one and one quarter miles in Rainbow lake in fifty-five minutes. This is certainly a good record for one of his age and no doubt he feels justly proud over the accomplishment of the feat.

Pure Olive Oil Castile Soap

It's absolute purity makes it an ideal soap for
children and for use on the most delicate tender
skin. This soap is not perfumed. Many a cheap
soap is covered up by a high grade perfume.

This soap should not be associated or compared
with ordinary 10c bar of toilet soap in the market.
It is an absolutely pure Olive Oil Soap, made by a
firm which has been producing soap of this descrip-
tion for years.

DAVID LOCKMAN DEAD

Well Known Resident of County Dies From Heart Failure.

David Lockman, a well known farmer of Morgan county, died suddenly Saturday morning at his home, six miles southwest of Jacksonville, from heart failure. Mr. Lockman had been complaining for about a week and last Friday he went to consult his family physician. On the morning of that day he had been affected with a smothering spell. This came on again Saturday morning about 3 o'clock and he got up from his bed and went to the pump to get a drink, after which he returned to the house. His wife saw at once that he was suffering and she asked him what was the matter, to which he replied "I'm very sick" and asked her to fan him. These were his last words, for he then gave a gasp and died before a doctor could be called.

Owing to the nature of the death, it was necessary to hold a coroner's inquest and Coroner Skinner was notified. Mr. Skinner was on his way to Edwardsville to attend a meeting of horse-shoers and word was got to him at Alton. He returned to the city and conducted the inquest Saturday afternoon, with the following as a jury: C. F. German, foreman; T. J. Mandeville, Edward Omeara, Dominic Casey, John Whalen, and William Omeara, clerk.

The witnesses were Mrs. Lockman and son, Leo, and the verdict rendered was that death was due to heart failure.

David Lockman was born in the state of New Jersey, May 31, 1847, and was the son of David and Bridget Lockman. Thirty-six years ago he was united in marriage with Miss Johanna O'Donnell in this city, and to this union were born five sons, all of whom survive: John of Beardstown, Edward of Kansas City, Frank, Lee and Charles, at home. He is also survived by three sisters—Mrs. William Carroll of Springfield, Mrs. Edward Omeara of Morgan county, and Mrs. James Rogers of Peoria.

Deceased was a consistent member of the Church of Our Savior and was also affiliated with the Knights of Columbus. He has been a farmer all his life and was the owner of 155 acres of land. Mr. Lockman was a man held in high regard by all who knew him.

Funeral arrangements have not been made.

HANK FIXTURES MOVED.

No sooner had the Ayers National bank closed its doors for the day Saturday than a force of the bank employees and special employees commenced the work of moving the fixtures and equipment to the temporary bank home in the Gallaher block. The work continued far into the night and as a result everything will be in readiness for business when the bank opens again at 9 o'clock Monday morning. The Jacksonville Transfer company moved in the heavy new safe, which now has a position back of a heavy grated door in the rear part of the vault. An expert sent here by a safe and vault company superintended the removal of the vault door from the old bank building. In cutting away a portion of the brick about the vault entrance where the door is to be placed workmen had a difficult time as the hard brick set in mortar presented a surface which would hardly yield to the heavy chisel. All the furniture changes will not be completed by Monday morning but the main work of rearrangement will have been done by that time.

POLITICS AND POLITICIANS.

Governor Wilson of New Jersey has been invited to address the Georgia legislature.

The Prohibition national committee will meet Dec. 6 to choose the time and place for holding the party's presidential convention.

Senator Gorman, son of the late Senator Gorman, is a candidate for the Democratic nomination for governor of Maryland.

Senator James B. McCreary, the Democratic nominee for the Kentucky governorship, filed that office something like a generation ago.

Thomas L. Hisgen, who was the Independence league candidate for president three years ago, denies the report that he intended to run for governor of Massachusetts this year.

Representative George W. Norris of the fifth Nebraska district has made definite announcement of his intention to be a candidate for the United States senate against Senator Norris Brown, whose term will expire in 1913.

On Sept. 11 the voters of Maine will decide upon the question of repealing the constitutional amendment providing for state wide prohibition. The amendment has been in force for 27 years.

After a long and bitter fight Timothy L. Woodruff, former lieutenant governor of New York and former chairman of the Republican state committee, has been forced to relinquish control of the Republican organization in Kings county (Brooklyn), where he lives.

In case Governor Denen seeks a third term, which now appears a probability, the primaries in Illinois next spring will see all the outgoing state officers candidates for re-election, with the solitary exception of the state treasurer, who is barred by constitutional provision from succeeding himself.

The Republican leaders in Pennsylvania hope to reduce the Democratic delegation from that state by the election of a Republican from the fourteenth district, where a vacancy exists by the death of Representative George W. Kipp, Democrat. A special election to fill the vacancy will be held next November.

Charles R. Jones of Chicago, chairman of the Prohibition national committee, has been making an extensive tour of the far west consulting with the leaders of the party in re-

WILL CONSIDER SITES.

The committee appointed by the stockholders of the Jacksonville Creamery Co., J. V. Breckon, Dr. J. R. Harker and J. W. Boston, to look up the matter of a site for the creamery, held a meeting yesterday morning. A number of possible locations are under consideration and still others will be looked up. The movement for the establishment of a creamery has now taken on definite form and it is certainly to be hoped that the enterprise will be speedily developed. One reason farmers keep comparatively few cows in this locality is from the fact that there has been no way to dispose of the surplus milk other than to sell it in a retail way or to use the cream for butter. The creamery will supply an easy way to dispose of the milk and probably more farmers will begin to keep more cows. The increase in the number of head of livestock will also be of advantage to the community as the greater acreage of land can thus be rested. Locally a good deal of interest attaches to the proposed plant for sanitary reasons as the pasteurized milk to be provided will be absolutely pure. Some reliable and substantial men are taking a hand in the enterprise and they intend to make the creamery a good business proposition for themselves and for Jacksonville. The greater part of the stock has been subscribed but some additional shares will be sold to provide against contingencies.

Enoch Arden

In two parts, and one reel of Western Comedy; 3,000 feet in all.

There is small need to describe Enoch Arden as the poem of Lord Tennyson is so well known, so suffice it is to say that this Biograph subject is an unusually faithful portrayal of that beautiful romance of Enoch Arden, Annie Lee and Philip Ray taken in scenes of rare beauty. This first part tells of the betrothal of Enoch and Annie, the despair of Enoch at his inability to cope with the demands of his increasing family obligations, and his sailing away to recoup his fortunes on a vessel bound for China. A storm is encountered, the vessel wrecked and Enoch and two companions are washed upon a tropical island, where they are forced to stay. Annie, all the while is ever hopeful of his return, while Philip, though an unsuccessful rival, shows a kindly interest in the little grief-stricken family.

Second part showing the marriage of Enoch and Annie, and his sailing off to recoup his fortunes. The vessel is wrecked, he and two companions are stranded on an isle, where they are forced to remain. Meanwhile, Annie is ever hopeful of his return. This part begins several years later, and while Philip sues for the hand of Annie she refuses, still faithful to her hope of Enoch's return. Finally she accepts for the sake of her children, and when her new baby came Philip's child—she is Philip's all-in-all. Meanwhile a ship in quest of water puts in at the island and Enoch now alone, his comrades having died, is rescued. His homecoming is sad indeed and he welcomes the death that keeps Annie in happy ignorance.

Directors Decide to Hold Circus and Various Other Social Events.

The regular meeting of the board of directors of the Y. M. C. A. was held Saturday evening in the Association building, when it was decided to give a circus, a chicken fry and a contract for a lecture course was accepted.

The committee in charge of the arrangements for the circus is composed of Judge F. E. Baldwin, chairman, and the same members who served on this committee last year with some additions. They plan to hold the entertainment in a tent on the Y. M. C. A. campus and have decided on October 6 as the day for the attraction. The directors stated Saturday evening that they would have many attractions never seen before in Jacksonville and that the only attraction from last year's program would be "Minet," the famous bareback rider.

A. C. Rice, chairman; J. H. Rayhill, Jr., and Dr. H. L. Griswold, compose the committee appointed in charge of the chicken fry. The date of the chicken fry has not been set, but it will also be held on the campus. The board members said they were greatly encouraged with the many assurances of donations for this event.

At this meeting the board accepted the contract of the Glazier Lyceum bureau of Chicago to furnish a course of lectures for the coming winter. This course will include a number of high class attractions, among them being: Dr. Cook, arctic explorer; Bishop Fallows, Hon. Henry T. Rainey, Illinois Glee club, Herrente, the magician, Thelma Rose trio, Juvenile singers, and the Chicago orchestra.

A. J. Gillips of Little Indian was a Saturday business visitor in the city.

FATHER SEEKS FACTS

C. H. Davis of Bristol, Tenn., Here to Learn About Death of His Son.

C. H. Davis of Bristol, Tenn., father of Charles B. Davis, who was killed by a Burlington train at the Routh street subway some time since, was in the city yesterday while on his way to Franklin. While here Mr. Davis talked with Coroner Skinner about the facts surrounding the death of his son and when he returns to this city Tuesday he expects to visit the scene of the accident. Mr. Davis is making his visit in an effort to secure some additional facts regarding the death of his son and also to straighten any affairs his son might have had in this locality.

Mr. Davis said that the deceased was his only child and that he left home some eight years ago. He stated that since that time he visited his home only once, in the winter of 1909. The father also said that the deceased was a good, obedient boy and had always been a hard worker.

MARKET CONDITIONS

Offerings of Fruits and Vegetables
More Plentiful Since Recent Rains.

The recent rains have had a good effect on gardens and fields and orchards and as a result the market offerings at the stores just now are better than has been true for some time past. Offerings in local markets of shipped in fruits and vegetables is also better and housewives are not having quite so much trouble in getting things for the table. There are peaches in great quantities and the range in price is from 60 cents to \$1.75 per bushel. The prospect is that peaches will continue to be plentiful for some time as the late fruit has not even commenced to ripen as yet. Apples too are plentiful and range in price from 40 to 60 cents per bushel. Tomatoes are coming in better but the effect of the recent heavy rains has been to split many of them open and the price is still six and seven cents a pound. The split tomatoes can be had for 50 cents a bushel and are excellent for making ketchup. Other prices quoted, as given below, will give a fair idea of market conditions.

Water melons, 15 to 40 cents.
Cantaloupes, 5 to 15 cents.
Green gauge plums, \$2 bushel.
Red plums, 15 and 20 cents gallon.
Summer squash, 10 cents.

THE BEATTIE MURDER

Grand Jury Will Probe the Now Famous Case—Strong Circumstantial Evidence Against Husband.

Richmond, Va., Aug. 12.—Intense and general interest is manifested throughout the state in the opening, next Monday, of the session of the grand jury for Chesterfield county, across the river from here. The grand jury will be called upon to investigate the Beattie murder case, one of the most sensational and puzzling crimes ever committed in that county. It is the general impression that there will be enough evidence submitted by the state to justify the grand jury to find an indictment for murder against Henry Clay Beattie, Jr., now a prisoner in the Henrico county jail, but at the same time it is well known that the state has added little to the circumstantial evidence obtained shortly after the crime was committed, that a reasonable motive for the alleged crime has not yet been found and that counsel for the defense has been working quietly, but diligently, assisted by a number of private detectives, and is evidently determined to make a desperate fight at the subsequent trial to save the accused from electrocution.

The history of the crime with which Henry Clay Beattie, Jr., has been charged by the coroner's jury, contains many features of unusual interest. The accused, who is now about 26 years of age, is the son of Henry Clay Beattie, Sr., a well-to-do businessman of this city. Young Beattie received a fair education and at an early age, began to indulge in a fast and reckless life. He had numerous affairs with girls, but only one had serious consequences. About four years ago he became intimate with Beulah Binford, a handsome girl, who, at that time, was not quite fourteen. The intimacy continued and two years ago a child was born to the girl. The young mother named the child Henry Clay Binford, but soon abandoned it to the care of some relatives. Later the child was adopted by Mrs. Mary Trout of Richmond, but it proved sickly and died in July of last year. To hush up matters young Beattie induced Beulah Binford to go to Raleigh, N. C., where she promised to remain, so as not to interfere with Beattie's marriage plans.

More to please his father, upon whom he depended for a living, young Beattie, about two years ago married Miss Louise Owen, the pretty daughter of a resident of Dover, Del. The marriage was not happy. Young Beattie did not abandon his fast life after marriage and even the birth of a child, about six months ago, did not improve the relations between the young married people. A few months ago Beattie met the Binford girl by accident at a baseball game at Norfolk and she was easily induced to return to Richmond, where Beattie promised to provide a house for her.

Beattie and the girl met frequently at different hotels in the city and, although they kept their relations secret, Beattie's father learned of the affair and is said to have threatened his son with the withdrawal of his support, should the young man not stop his dealings with the Binford girl. In the second week of July last young Mrs. Beattie, with her baby, went to visit her uncle, Thomas E. Owen, within a mile of South Richmond. She was to return home on July 19. On the evening of July 18, young Beattie came to Mr. Owen's house in his automobile, to take his wife out for a ride. They left, driving along the Midlothian Pike. About 11 o'clock that night Beattie returned to Mr. Owen's house in his auto, steering with one hand, while he was holding his wife's lifeless body with the other.

Beattie said that his wife had been shot and killed with a shotgun by a tall man with a long beard, who had held them up, while they were driving along Midlothian Pike. The case called for an investigation by the coroner and after a long and quite sensational hearing the coroner's jury gave the verdict that Mrs. Beattie had been shot and killed with a shotgun in the hands of her husband, Henry Clay Beattie, Jr. The latter was arrested and lodged in Henrico county jail, where he spent his time unconcernedly, smoking cigarettes and strumming on his guitar. The Binford girl was arrested as a possible accomplice. Since his imprisonment Beattie stuck to his original story, but his position became serious when Paul Beattie, a poor relative of the accused, confessed that he had bought for the prisoner the shotgun with which the murder had been committed. The state has succeeded in forging a strong chain of circumstantial evidence against Beattie, but the apparent lack of a motive is considered a weak spot, which may vitally affect the chances of a conviction.

REVIEW OF TRADE

Improvement Noted in Trade for Future—Further Evidence of Confidence.

New York, Aug. 11.—Bradstreet's to-morrow will say:

Orders for future delivery indicate further moderate improvement in the trade situation, house as well as road sales expanding in fair degree. Many visiting buyers are in the country's leading markets. Talk from buyers in general is optimistic enough, but, withal, purchases on the whole show that considerable caution prevails. This attitude is especially apparent among those entering the cereal producing regions, where crops underwent further deterioration in July.

It is noteworthy, however, that recent rains have made for a better feeling as regards corn crop results and in consequence merchants are fostering more roseate anticipation, though still acting conservatively. Cautious buying heretofore has kept stocks within controllable bounds and the advance of the season together with the arrival of buyers should bring about a further seasonable increase in trade.

Dry goods, allied lines, and millinery lead in point of relative activity.

Business failures in the United States for the week end Aug. 10, were 208, against 208 last week, 231 in the like week of 1910, 219 in 1909, 249 in 1908 and 146 in 1907.

Dun's Report.
New York, Aug. 10.—R. G. Dun & Co.'s Weekly Review of Trade to-morrow will say:

There is further evidence of a feeling of confidence that the autumn will bring a broadening in trade activity, while business now continues to expand moderately.

The expansion in the demand for steel products continues very gradual. Strong competition is noted in finished lines whenever important business is in prospect, and concessions in prices are reported. Railroad buying is restricted, but conditions in the structural division are more promising.

In footwear buyers are not disposed generally to take large amounts than for current needs. Leather is still in moderate demand, buyers operating only in a limited way. Domestic hides continue to sag, with further reductions in certain varieties of packer stock and country hides. Tanners are generally holding off in anticipation of still lower prices.

CHICKEN FRY.

Mr Farmer

Has it occurred to you that while the drought has materially affected your crops and income this year, that the crops and income of the farmers or irrigated land in the Big Horn Basin of Wyoming and Yellowstone Valley of Montana are not so affected? In view of this, don't you owe it to yourself and those dependent upon you to at least look into and read up on this matter? Or, better still, go out and see the advantages this country offers you? The center of the Basin is less than forty hours from Omaha, and home-seekers' excursions leave Omaha every first and third Tuesdays. Why not go out with me on the next excursion? I will introduce you to the farmers and you can hear what they have to say about conditions there. I am employed by the railroad and my services cost you nothing whether you buy or not. If this interests you, descriptive and illustrated literature of these wonderfully fertile and productive sections will be sent free.

ILLINOIS RICH IN RECLAIMED LANDS

Thousands of Acres Thought To Be Worthless Now Under Cultivation—Last of Rich Districts.

Few people realize what is being done in the way of reclaiming the land along the Illinois river from Peoria to Grafton. Thousands of acres that, up to a few years ago, were under water from one end of the year to the other, are now producing 100 bushels of corn to the acre.

The lands are not reclaimed in a few months, however. It takes several years to make all the improvements which are very expensive, but if we stop and consider what the land is worth after it is put in cultivation, the expense is small.

It will well repay anyone to take a trip down the river, provided they can arrange to stop and go over some of the big levee districts, for the idea of the improvements can be obtained unless one walks across the levees and views the big corn fields.

In order that our readers may get a better understanding of what we mean by improving these low lands, we will state the first step is for a lot of farmers owning from 3,000 to 20,000 acres, to petition a county court for a levee and drainage district. After that is allowed, an assessment against the land for levee, drainage, levee ditch and pumping plant is made against the land. This assessment usually runs from \$25 to \$40 per acre against all land inside the district. Bonds are issued against the land for the total amount that runs from ten to twenty-five years. As soon as the money is in the treasury, contracts are let for building the levee, ditching and pumping plants. In addition to this assessment an annual tax for pumping and maintenance of the levee is made.

In some of the districts the land is lower than the bed of the river and the pumps have to be operated all the year. Otherwise, the water would stand at the same depth as it does on lands not leveed.

A district is now being formed east of Peoria. The assessments for which will be \$75 per acre. The land is very low and the expense of maintaining the levee will be very great.

One of the best improved districts is the LeMarch, opposite Pekin. To stand on the levee and look over it, it appears to be a sea of corn, but when you drive through it, you find numerous wheat fields that made from twenty to forty bushels to the acre. The corn looked as if it would make from 75 to 100 bushels to the acre. Every foot of this land was in cultivation and practically the whole tract was redeemed from marshes and sloughs that are lower than the bed of the river.

The largest district on the river is the Springfield, which contains about 25,000 acres. The work of reclaiming it is not yet completed, but when it is done it will be as fine as any of them along the river. We saw corn in this district that measured eighteen feet high. This may be considered by some a fairy story, but all we ask is that people go and see for themselves. Commissioners in this district have been handicapped in their work on account of litigation. The state has claimed that Springfield Lake was navigable water and the question is now in the supreme court.

At Beardstown is located the noted Coal Creek district that has been put under a high state of improvement. Every foot of it is producing larger crops than the famous fields of Logan and Morgan counties. On down the river are many districts that will in a few years be the equal of any farther up the river. In Scott and Greene counties is located the Hillview district that in a few years will be the equal of any along the river. There were a number of big lakes in this district that will produce thousands of bushels of corn this year.

On down the river, opposite Kampsville and Hardin is the big Eldred district, the levee for which has just been completed. In a year or two every foot of this land will be reclaimed and will be in a high state of cultivation.

The land on the lower end of the river is higher than in the Beardstown and Pekin vicinity and the pumping charges are, of course, higher. The lakes from Scott county down to the mouth of the river have been dry since June, while in the upper districts the pumps have to work all the year.

The day was when the lowlands along the river could be obtained for a song, but today the marsh land, covered with three feet of water all the year, is selling at \$25 an acre, while the same low land in the improved districts at Pekin and Beardstown is selling at from \$150 to \$200 an acre.

SAW FAST HAY HARVEST.

Mr. and Mrs. Charles B. Graff are at home after a visit in Northern Minnesota. Among other cities they visited were Minneapolis and North St. Paul. At the latter place they spent a few days on the farming lands owned by Messrs. Lewis, Reges & Graff, he being a member of the firm, and witnessed the cutting and curing of 700 acres of timothy hay. He reported the weather fine and bracing, with sufficient rain fall to produce good crops of all kinds. Potatoes were abundant and fine and large. One farmer had 40 acres planted and he was expecting a fine yield. Mr. and Mrs. Graff returned in good health after a very enjoyable trip.

CHRIST JAMES SON AND DAVID CHRIST'S SON.

(By W. W. Crane)

"What think ye of Christ? Whose son is he? They say unto him, The son of David." He saith unto them, How then doth David in spirit call him Lord, saying, The Lord said unto my Lord, Sit thou on my right hand, till I make thine enemies thy footstool. If David then call him Lord, how is he his son? And no man was able to answer him a word, neither durst any man from that day forth ask him any more questions. Mt. 22:42-46. In clearing up this little thing to do is to fix in our mind the fact that Jesus is the son of Jehovah, God the ever-existing creator, who created his son the first-born of every creature. Col. 1:5. Whilst God and Christ are one in sentiment and one in purpose, they are two separate and distinct individuals. Before the mountains were settled, before the hills, was I brought forth. Prov. 8:25. (Brought forth by his ever-existing Father, Jehovah).

Next, we may understand that the babe Jesus was born of Mary, who was a lineal descendant from David, through his son, Nathan. Therefore, it is easy to understand how Jesus is called the son of David. Next, we may discover how David can be the son of Jesus Christ. The argument so far deals with the present, and the past. The next portion of the problem, pertains to the future. First, we must know that Jesus came to seek and to save that which was lost. Luk. 19:10. Human perfection and everlasting life were lost by Adam's disobedience and by man came death, by man came also the resurrection. 1 Cor. 15:21.

Will ransom thee from the power of the grave. Hosea 13:14. "Awake and sing, ye that dwell in the dust." Isa. 26:19. "And ye shall know that I am the Lord, when I have opened your graves, O my people, and brought you up out of your graves, and shall put my spirit in you, and ye shall live, and I shall place you in your own land." Ezek. 37:12-13. Good, good, but how about David, and where is he? "No man is ascended to heaven, but he that came down from heaven." John 3:13.

That declaration shows that David is not in heaven. Listen! "For David is not ascended into the heavens." "I will freely speak unto you of the Patriarch David, that is both dead and buried, and his sepulchre is with us unto this day." Acts 2:29-34.

That is to say David's dust is still in the dust of the earth. The dead know not anything. Eccl. 9:5. "The day of your death, your thoughts perish." Ps. 146:4. We may next understand that when the Christ shall appear, he will set up his kingdom (Dan. 2:44.) and begin the world's great day of judgment. Act 17:31. Listen! "The Lord Jesus Christ, who shall judge the quick and the dead at his appearing and his kingdom." 2 Tim. 4:1. "And the government shall be upon his shoulder, and his name shall be called, Wonderful Counselor, the Almighty God, that ever-lasting Father, the Prince of Peace." Isa. 9:6. "All that are in their graves shall hear his voice and shall come forth." John 5:28, 29. "And ye shall see Abraham, Isaac and Jacob and all the prophets in the kingdom." Luke 13:28—including David, the prophet. Yes, the Everlasting Father for the world will give life to the dead ones and will place them in their own land. Ezek. 37:13. Therefore, as "all that are in their graves shall hear his voice and come forth." (John 5:28. We may understand he will be the life-giving Father to David, as well as to the other prophets (Luke 13:28) and the world in general. Listen to what God says to Christ and his elect body. "Instead of thy fathers (patriarchal) shall be thy children, whom thou mayest make princes in all the earth." Ps. 45:16. "And my servant David shall be prince forever." Ezek. 47:25. "Behold a king shall reign in righteousness and princes shall rule in judgment." Isa. 32:1. "The Lord shall enter into judgment with the ancients of his people, and the princes thereof." Isa. 3:14. In conclusion we will recall how Jesus was the son of David because he descended from David. Also, we have seen that Jesus Christ will give life to David, and therefore David will be a son of Christ, for the word "rather" means "life-giver." Thus, it is clear that Jesus was the son of David and also it will be true that David will be the son of Christ.

ILLINOIS STATE BANKS

Report Shows Healthy Condition—Auditor of Public Accounts Shows Record for a Year.

Springfield, Aug. 12.—A healthy condition of the state banks of Illinois, showing an increase in earnings from various sources, is found in the report of the auditor of public accounts as to the condition of the 480 state banks in Illinois.

The data is compiled from reports made in pursuance to the call issued July 1, 1910.

The total capital, surplus and undivided profits July 1, 1910, was \$97,570,738.32, while the total investments at that time were \$587,231,205.30.

The gross earnings of the banks from July 1, 1910, based on the resources available since that time and up to July 1, 1911, were \$24,249,556.30. These are to be found in the following classifications:

Expenses, taxes and interest paid, \$21,648,402.78.

Losses and reductions in value charged off, \$1,556,828.07.

Net earnings, \$11,044,753.45.

Their gross earnings per capital, surplus and undivided profits increased from 33 to 35.07 per cent, while the gross earnings per capital alone decreased from 63.3 to 60.2 per cent. The net earnings per capital increased from 13.50 to 19.37 per cent.

Of the 480 state banks reporting, 318 paid dividends aggregating \$6,167,648.

The time savings deposits increased \$22,941,171, reaching a total for the year of \$258,545,166.

The number of savings depositors was 831,780, an increase of 92,322.

The average rate of interest paid on these deposits was 3.06 per cent.

WHAT I WENT THROUGH

Before taking Lydia E. Pinkham's Vegetable Compound.

Natick, Mass.—"I cannot express what I went through during the change of life before I tried Lydia E. Pinkham's Vegetable Compound. I was in such a nervous condition I could not keep still. My limbs were cold, I had creepy sensations, and I could not sleep nights. I was finally told by two physicians that I had a tumor. I read one day of the wonderful cures made by Lydia E. Pinkham's Vegetable Compound and decided to try it, and it has made me a well woman. My neighbors and friends declare it had worked a miracle for me. Lydia E. Pinkham's Vegetable Compound is worth its weight in gold for women during this period of life. If it will help others you may publish my letter."—Mrs. NATHAN B. GRAYSON, 61 N. Main Street, Natick, Mass.

The Change of Life is the most critical period of a woman's existence. Women everywhere should remember that there is no other remedy known to medicine that will so successfully carry women through this trying period as Lydia E. Pinkham's Vegetable Compound.

If you would like special advice about your case write a confidential letter to Mrs. Pinkham, at Lynn, Mass. Her advice is free, and always helpful.

NATURE SPARES

The Steeple Rose From Grief.
What a fortunate provision of nature it is, that deprives the mind of suffering, for how poignant would be its grief to discover, in the height of its blooming glory, that a cancer fed at its heart, and that its beauty and fragrance were doomed to decay. Nature always spares the sufferer; she is a veritable store-house of pleasing rewards, for those who seek her aid. In the years gone by falling hair and grayness have cast a gloom over the lives of thousands of young women, but thanks to the investigations of scientists the true cause of hair destruction is now known to be a germ or parasite that burrows into the hair follicles. Newbro's Herpicide absolutely destroys this germ, thus permitting the hair to grow as nature intended. Sold by leading druggists. Send the stamps for sample to The Herpicide Co., Detroit, Mich. LETTER FROM SWITZERLAND

(By S. W. Nichols)

July 15.
We have just landed at Lucerne and another grand mountain ride we have had and more scenery and while it was hardly as hair raising as the one from Geneva to Interlaken it was superb like all the rest.

This time we crossed the mountain range going by the Bruenig Pass and the experience was a novel one. The engines here were used and not electricity, though I could hardly understand that for there was plenty of power going to waste in the mountain streams all along the way.

I had the pleasure of riding next to the engine for no time and strength are wasted in hauling baggage cars on these small trains but the little amount of impediment is stored away somewhere and with three cars, the whole not weighing nearly as much as a common standard day coach or sleeper on our roads the little machine started off.

I stood on the front platform of the front coach and watched the engineer and fireman as we went up and the sturdy fellows seemed to realize the importance of their duties. The engines are curiously constructed and I never saw anything like it in our country though perhaps we have them. Where the road is at all level the track is like any other but when a steeper gradient is reached then there are cog wheels in between the track like the cog wheels of a clock. The engine which is supplied with a double set of cylinders and gearing is so constructed that the engineer drops down the mechanism which engages with the cog in the track and away we go struggling and puffing.

The whole engine could almost be put in the cab of one of our moguls and it has no tender at all, the little bit of coal being stored right behind the fireman and engineer who have no seats and get along as best they may.

They use coal bricks which make little smoke and have great steam-making power and the little engine makes small work of drawing the small train up the mountain side. The way was hardly as long as the long road up Pike's Peak but it was romantic and lovely.

Leaving the little town of Brinz we began the ascent and up, up, up we went doubling and turning, or as a sailor would say, tacking, till we had gained quite a height and then the valley looked smaller and smaller and the houses less and less and on we went till the summit was reached and we stood at Bruenig station. There the turned the engine around for it seems they felt they could hold up back better if the machine was going backward and perhaps they knew best but it seemed strange. I couldn't help noticing the extreme care bestowed on every detail by the engineer and how much he felt the importance of his duties. There is a train each hour from Interlaken to Lucerne so you see the pass is often climbed.

The sight going down the mountain side was as entrancing as any others and the same glowing terms may be used describing it for it was indeed grand. Away in the distance towered the snow clad summits of the higher peaks while those near by were clothed in deepest green, making a wonderful contrast with what we saw all about us. On the hillside were the humble homes of the people who work there so hard for what they have in this life. Green and lovely were the valleys and the streams were enough to make one almost wild when he thought how many they had and how well they might spare us just now.

Occasionally we would see a little village nestled among the trees and always a spire proclaimed the presence of a church for the people of this country are religious above all else.

On we went and glad to see the beautiful sights before us. Once we went roaring through a long tunnel and though it was dark we were troubled but little with the smoke and again we emerged and again a new sight greeted us as we came in to daylight. A gushing stream fed a valley below and a hamlet which looked as peaceful as heaven itself and almost as calm nestled amid the trees and pastures below and looked like a cool retreat for wanderers worn with the toils of the city for there they could commune with nature and look at the beautiful and so inclined might.

Look through nature
Up to nature's God.

S.S.S. REMOVES ALL HUMORS FROM THE BLOOD

The cause of all skin diseases can be traced to some humor in the blood, and therefore the cure of any skin trouble can come only through a thorough cleansing of this vital fluid. Salves, washes, lotions, etc., relieve some of the itching and discomfort, help to reduce inflammation, or aid in keeping the cuticle clean, but such treatment does not reach the blood, and of course can have no real curative effect. S.S.S. cures Skin Diseases of every kind because it purifies the blood. It is an internal remedy for an internal trouble, and works on the only reasonable and certain method of cure. S.S.S. removes all acids and humors from the circulation and leaves the blood stream rich, healthy and nourishing in order that it may supply the cuticle with the necessary properties to restore it to its smooth, normal condition. Then a cure results because the old exciting cause has been disposed of. Book on Skin Diseases and any medical advice sent free to all who write. S.S.S. is sold at drug stores.

Here Are Price Saving Suggestions

The summer days are far from gone, but we have certain lines with a distinct summer tone, that we want to clear out. To make these goods move quickly, we are making prices a matter of second consideration.

Seasonable Summer Goods at Surprising Figures

Refrigerators

It may seem a little late to buy a refrigerator, but if yours is worn or crowded the purchase of a new one will save many a dollar. A new refrigerator replacing an old one, pays for itself.

Ice Cream Freezers

If you do not know the delight of freezing ice cream and ices at home, you should buy one of our freezers now. It will help you to make the most refreshing of desserts at a very low cost. Ice cream is not an extravagance; it's a food.

Hammocks

Lots of Jacksonville people are sleeping in Hammocks these warm nights. Not everybody can afford an outdoor sleeping porch, but everybody can have the peace and quiet and comfort that come from a hammock. We are selling them now at deep cut prices.

Gasoline Stoves

accidents from gasoline stoves are caused only by carelessness. If you are careful there is no more danger in a gasoline stove than in a fireless cooker. Don't fuss and worry over a hot kitchen range. Keep your temper even and do your baking, frying, stewing and all other cooking on one of our gasoline stoves. Big reduction in prices.

PROGRESS IN ITALY

Rebuilding of Venetian Campanile Nears Completion—Treasures of Rome Gradually Being Restored.

(By Associated Press.)

Rome, Aug. 12.—Although great disasters have since befallen Italy, no one has forgotten the consternation experienced when it was learned that the great Campanile of Venice had fallen. That was nine years ago, on July 14, 1902, and the rebuilding is only now approaching completion, though there is so little to do that it may be considered to be again a perfect whole.

Next year the Biennial International Art Exhibition will be opened, and at the same time the Venetians will be celebrating the fete of St. Mark, their patron saint, so that it has been decided to put off the inauguration of the Campanile until that period.

It would be difficult in America, where buildings come and go, to appreciate what that tower meant to the Venetians. It epitomized their history, and was a visible reminder of their past greatness and that what has been done can be done. It began as a watchtower in the dim ages before the Christian world was in its teens, developed into a bell tower, its bells ringing at the first hint of danger, and was latterly considered a church tower, a part of St. Mark's Cathedral. But it was more than a tower, it was a work of art, as its foot was adorned by the wonderful Loggia of Sansovino, and its head was crowned by the beautiful belfry wherein hung the historic bells.

To day it stands just as it was before, a reminder of the wonderful art to almost seem a miracle. The day after the fall there was nothing but a rubbish heap to mark the site, but that rubbish heap presented great possibilities. Out of it came many whole bricks which were re-used and served as models for the new. The angel, which had stood on the top, was uninjured, but of the Loggia nothing remained but minute particles which were carefully put aside. Over these one man worked for years, reconstructing the famous terracotta of the Madonna and Child with St. John, out of 2,000 fragments, which now make so perfect a whole that the patchwork must be pointed out to be detected, but unfortunately the St. John was so reduced to dust that the group now lacks this figure. The bronze statues and the famous gates, have been restored and are now finished, the whole Loggia is in place, and Venetians begin to think that the collapse was a bad dream.

The bells were badly damaged, only one of the five escaping injury. The others have been recast at the expense of Pope Pius X. Upon the largest of the four recent ones, there is an inscription setting forth that the pope has had them done, with a facsimile of his signature "Pius X. P. P." Their first peal was recorded by a gramophone which was sent to the Pontiff and which he appreciated highly, remarking on their clear sound. He was in the Piazza of Venice when the Campanile collapsed and it was in his presence and under his benediction that the corner stone was laid, but the inauguration will have to be without his physical presence, although he will send a representative and his blessing.

Rome has slowly, as money was at hand, been isolating her treasures of the past, and, if not restoring as the charm of many would be spoiled if touched, at least strengthening and preserving them. In this way the glorious Baths of Diocletian have been reclaimed and some of the Forums joined. Now it is the moment of the mediaeval towers, and particularly that called "of the Milizie," on the slope of the Quirinal hill. Several have been restored and are in an absolute state of preservation such as the Anguilara, which has a fortified house attached and is the best example of mediaeval architecture in the Eternal City; Torre della Scimmia, known to Americans as "Hilda's Tower," as it was here that Hawthorne's heroine fed her doves; and others scattered here and there almost as thick as the leaves at Valambrosa. However, up to now the most important of these interesting structures, Torre delle Milizie and Tor de Conti, have been left untouched and unnoticed, probably because they are in rather inaccessible places.

As one goes up the slope and turn of the very modern Via Nazionale he is confronted on the right by a long, monotonous, low building used as a barracks, and just opposite by the unique hanging gardens of the Aldobrandini family. Behind the barracks rise a massive edifice in two divisions, the Milizie Tower (Tower of the Militia), while down a precipitous slope hard by is the Torre del Grillo (Tower of the Cricket) where the story runs, one of the family of that name forbidden by the Pope to throw rocks, down by the heads of passing Jews, asked if a might at least throw nuts. Having had an amused permission for the Pontiff he dispatched several more of his enemies by hurling down pine cones, in Italy as hard as any stone, and containing inside a kernel. A few yards is the Tor de Conti, so large that it is rented in flats as an apartment house.

The Tower of the Milizie is now in the court of a convent, has before it a barracks, at one time a monastery, and a church. These are the property of the state and will be done away with, leaving a full view of the tower tall and severe in all its grandeur, and the ruins of the Baths of Palladium, with a large and magnificent panorama of the Forum of Trajan and the new monument to Victor Emmanuel.

Mr. and Mrs. J. I. Graham have returned from a pleasant vacation trip of a few weeks. Mrs. Graham has been away for about a month, making a trip through the west. The past two weeks she and Mr. Graham have spent at the Quiver Lake chalet at Havana.

NEWS FORECAST FOR THE COMING WEEK.

Washington, Aug. 12.—President Taft is scheduled to go to Ocean Grove, N. J., Tuesday to address the Methodist camp meeting there and later in the week he expects to go to Beverly to begin his belated summer vacation.

Admiral Togo, whose visit to the United States is attracting much attention, will remain in New York city until Wednesday when he will go to Boston. He will remain in Boston two days visiting the Charlestown navy yard, Harvard university and other places of interest in the vicinity, departing Friday evening for Niagara Fall.

The annual month of rifle competitions for the picked shots of all branches of the United States service and the militia organizations of the different states will begin on the ranges at Camp Perry Monday with the opening of the twenty-ninth tournament of the National Rifle association and the ninth matches of the National Board for the Promotion of Rifle Practice.

The political calendar of the week calls for several meetings of interest to the leaders of both parties. Kentucky Democrats will assemble in Louisville Tuesday to formulate the platform on which the state ticket will make the fight for election next fall. In Nebraska on the same day the state primaries of all parties will be held for the nomination of candidates for the minor state offices to be filled at the next election. At Harrisburg there is to be a meeting of the Democratic state central committee of Pennsylvania to consider proposed changes in party rules and to carry out the plan for the redistricting of the state. At the same time and place there is to be a meeting of the Democratic editors to form a state league. At Columbus, Ohio, an outing is to be held by the Jefferson club with William J. Bryan as the guest of honor. The club is an "insurgent" Democratic organization and is understood to be opposed to Governor Harmon of Ohio for the presidential nomination.

The conventions of the week will include those of the International Typographical union at San Francisco, the American Press Humorists' association at Boston, the Irish Catholic Benevolent union at Toledo, the Loyal Order of Moose at Detroit, the American Pharmaceutical association at Boston, and the National Negro Business league at Little Rock.

Greg McEvers of San Francisco, Calif., is visiting his grandparents, Mr. and Mrs. Henry Miller, and his sister, Mrs. Ed Ryan, this week. Since leaving Winchester about four years ago, Greg has completed a course in law in the California state university and is now connected with one of the leading law firms of San Francisco, with splendid opportunities for advancing in his chosen profession. He has the grit to persevere, and we predict that some day Winchester will be proud to claim him as a native son.

GALA WEEK FOR FUNNY MEN.

Boston, Mass., Aug. 12.—Following close on the heels of the advertising men's convention, Boston is called upon to entertain the annual gathering of the American Press Humorists' association and she is wondering today if she will not have to resort to the bromo bottle after playing host to the two big round-ups. Though the latter gathering does not begin its sessions until Monday many of the newspaper funny men put in an appearance today and are spending the time seeing some of the sights of the city which has been the butt of many of their witlings and thereby put many a dollar in their pockets. An entire week of hard work and recreation combined is planned for the humorists. The Boston members of the association have been making up the programme and have arranged for a week that will go down in the annals of the association as the best it has ever enjoyed. The business sessions will be presided over by "Cy" Warman of Montreal, widely known as a humorist writer and poet.

Miss Nelle Reed of the clerical force at the Trade Palace expects to leave this morning on a vacation of three weeks and will visit at the home of her parents in Greenfield and attend the "Home Coming" on the 15-17 in her home town. She will also visit at other places before resuming her duties in the store.

Grain Letter.
Chicago, Aug. 12.—Wheat. There were few interesting developments. Trade was small and mostly professional. Foreign advices are a bit bullish. More favorable crop news is coming from the northwest and particularly from Canada. Res dispatches indicate an unusual demand for harvest hands, which would not seem to bear the claims of serious prospective crop losses, as has been the case for some time past. A good deal of wheat is for sale from the cotton of commission houses are supplying the market for the Armour-Libbey combination. There are a good many indications that Europe has been quietly buying American wheat and this feature is probably at the bottom of the strength in the face of big stocks and liberal receipts.
Corn—Leading local bulls continue to support prices. Outside interest is small, but country offerings are light and new corn are extremely light and the market is under little pressure. Cash market conditions have been favorable for the past several weeks and the new crop has gained much. The slight increase in country offerings indicate a more optimistic feeling in regard to crops. Pastures have been revived by general rains and the big supply of fall feeding—resulting should exert a bullish influence. Later in the crop year the corn shortage and the hay market failure may result in higher prices. Temporarily scaling market can be expected which is likely to decline should receipts increase—only moderately.
Provisions—Liquidation has been very heavy the past week. There was more of it to day. Shorts were good buyers on the soft spots, finally causing a rally. The short interest has been greatly reduced the past two or three days and as prices are generally considered high for the present, product is very likely a sale about its current level.

BIRTHDAY OBSERVED.
Pleasant Surprise Party Given in Honor of W. H. Mosely.
About thirty of the neighbors of W. H. Mosely, who resides east of Pisgah, gave him a pleasant surprise Saturday evening, it being the occasion of his 44th birthday. Mr. Mosely had come to the city and when he returned in the evening he found that his home had been invaded by a company of friends, assembled to congratulate him upon his anniversary. It took him a little time to get his bearings as he had gained no inkling as to what had been in the minds of his neighbors, but he soon entered heartily into the occasion, as did every one else, and a most enjoyable evening was spent. After an hour spent socially it was decided that a speech from the honored host was in order and J. B. Beekman, acting as chairman, introduced Mr. Mosely, who responded in a happy frame of mind, relating some of the experiences through which he had passed in the forty-three years, and thanking all for their manifestations of friendship. Speeches were also made by Al Curry and Ivan Wood.

Before departing, the guests were served with ice cream and cake. The party was a most delightful affair in every particular and Mr. Mosely was the recipient of a number of nice presents.
